

CONTINUITY & RESILIENCE

1 Day Certified ISO 31000 Professional Workshop

Course description:

The workshop presents Risk Management Best Practices largely via case studies/examples from industrial sectors such as insurance, aviation, shipping etc. which are typically on the forefront of Risk Management. The workshop will also look to cover Risk Management models such as the Risk Management: ISO 31000, Aon Risk Map 2012, COSO ERM Framework 2013 and also events such as the Chernobyl nuclear disaster, Japanese Tsunami etc. Risk Management Framework topics like Risk Identification, Risk Analysis, Risk Response & Risk Mitigation and Planning will be covered during the workshop.

The workshop also covers the elements of a Risk Management Plan, which include the following information:

- Purpose and scope
- Risk management methodology
- Overview or summary of risk
- Risk identification
- Risk analysis
- Risk response planning
- Risk monitoring and controls

This workshop entitles you to 8 CPE credits.

The workshop will be followed by a 25 questions, 25 minutes, open book exam of objective type questions. Those who clear this exam (scoring minimum 60%) will receive 'Certified ISO 31000 Professional' certification.

Learning Objectives:

- Identify as many risks as possible
- Risk analysis
- Review of the risk analysis
- Evaluate mitigation strategies
- Develop risk mitigation plan of action

Who should attend:

- All Risk Management professionals and those from other functions involved in the process of Risk Management System, Audit, Self-Assessment, Maintenance and Improvement in their or other areas and interested in learning more about global Risk Management best practices and the ISO 31000 standard.
- Professionals from all 3 levels (Strategic, Tactical and Operational).
- Professionals from Risk Management related domains like IT DR, BCM, Crisis Management.
