

CONTINUITY & RESILIENCE

1 Day Certified IT Disaster Recovery Professional Workshop

Course description:

Based on the BCM standard ISO 22301 lifecycle, the 1-day IT DR Workshop provides an emphatic overview of the entire IT Disaster Recovery lifecycle. This workshop will be very useful for IT planners, Data Center professionals, senior management involved with oversight of business continuity and BCM/DR practitioners. Training methodologies include presentation based teaching and individual/group exercises based on various cases, while group discussions, knowledge checks and quizzes are made use of resulting in a delightful participant learning experience. Video clips add to the effectiveness of the training. The workshop culminates in an examination leading to certification called 'Certified IT Disaster Recovery Professional'.

This workshop entitles you to 8 CPE credits.

Learning Objectives:

- Provide an appreciation of the significance of IT Disaster Recovery
- Establish the prominent role of IT DR in the BCM lifecycle
- Provide insight into the various aspects of IT DR planning
- Understand business imperatives of IT DR
- Appreciate linkages of IT Disaster Recovery with IT Governance, IT Service Management and Information Security
- Understand the nuances of performing an IT BIA
- Assess the current IT DR preparedness Vs IT DR Requirement
- Provide an overview of contemporary IT DR practices

Who should attend:

- Management Representatives vested with BCM responsibilities
- Full-time or part-time IT/BCM/Operations and other IT Professionals interested in learning more about Global IT DR Best Practices
- Practitioners from IT DR or BCM-related domains such as Crisis and Risk
- Data Center Managers with DR responsibilities
