

CONTINUITY & RESILIENCE

## 1 Day Green IT Professional Workshop

---

### Course description:

This 1 Day Workshop covers the fundamentals of Green IT. The participants are taken through concepts, terminology, practices and exercises.

The participants learn RoI, Payback Period, TCO, CBA as related to Green IT implementation. The learning also includes the concept and calculation of Carbon Footprint. The training is a combination of classroom lectures, discussions, simulation exercise, and videos. This workshop offers a high-paced, structured, eye-opening and comprehensive learning experience.

The participants take an open book examination at the end of the day – those who clear (60% pass marks) get the 'Green IT Professional' certification. The examination comprises of 25 objective type questions to be completed in 30 minutes.

### Learning Objectives:

- Gain appreciation of the criticality of Green IT and its key drivers
- Understand the critical steps involved in implementing Green IT practices e.g. establishing carbon footprint, learning TCO, RoI, CBA as related to Green IT, risks involved in Green IT implementation and their mitigations
- Effectively manage Green IT Program
- Prepare for the 'Green IT Professional' examination

### Who should attend:
