

CONTINUITY & RESILIENCE

2 Day (ISMS): Transition Course from ISO/IEC 27001:2005 to ISO/IEC 27001:2013

Course description:

This course is meant only for those who have already passed the 5-day ISO27001 Lead Auditor course, based on the 2005 release. These individuals need not attend the 5 day LA again to get certified to the 2013 release. Attending this 2 day transition course will be sufficient.

Transition training programme is an intensive course and enables participants to develop the necessary expertise to support their organizations in transitioning from ISO 27001:2005 to 27001:2013.

Training methodologies include classroom lectures and discussions on the audit process, and also individual/group exercises based on a case study.

This course entitles you to 16 CPE credits.

Learning Objectives:

Upon completion of this training, participants will be able to:

- Explain the purpose and use by standard writers of Annex SL Appendix 2
- Describe in outline the framework for a generic management system
- Explain the new and revised terms and definitions
- Explain the new requirements relating to Context, Leadership, Planning and Support in Annex SL Appendix 2
- Transition arrangements from ISO 27001:2005 to ISO 27001:2013

Who should attend:

- As a prerequisite for attending this training program, delegate should have a good knowledge of ISO/IEC 27001:2005 and the principles of ISMS.
- Course is best suited for top & middle management, information security, business continuity and risk.
- ISMS Team Head and members, ISMS Project Managers, Information Security management professionals, internal/external auditors and consultants wanting to auditing the organization's Information Security Management System (ISMS) All Information Security professionals and those from other functions involved in the process of Information, Internal and External Auditors responsible for auditing the effectiveness of the ISMS and Lead Auditors.
