PCI DSS Introduction Training Course

Workshop description:

The PCI DSS is administered by the PCI Security Standards Council (PCI SCC) with the specific objectives of decreasing payment card fraud across the internet and increasing the security of confidential payment card information.

Every organization that stores or transmits or processes card holder data must comply with PCI DSS standard. Compliance to the standard is regulated and enforced by payment card brands, such as VISA, MasterCard and American Express, directly or through their partner relationships with 'acquirer' banks. Developed by a PCI Professional / Cobit®5 Practitioner this two-day training course builds a clear understanding of the PCI DSS and enables you to plan a cost-effective, time-efficient compliance project.

Course Objectives:

This 2-Days PCI DSS Introduction Training course provides the candidate with an overview of PCI Council, its founders, the various standards & frameworks that it is responsible for, more specifically it introduces the candidate to PCI DSS, a data security standard established by the council for the protection of Card Holder Data. During the course, tutor will take the opportunity to discuss how PCI DSS applies to an organization, a typical PCI DSS Program, Compliance Life Cycle, relevant stakeholders as well as their responsibility during the compliance life cycle. Candidate will further be exposed to some of the most recent Fraud & data Breaches and how compliance to PCI DSS will assist in the mitigation of such risks.

Who Will Benefit from This Course:

All staff members who have been tasked to participate in a PCI-DSS project, and requires the basic understanding of the standard and its compliance life cycle.

Learning Outcomes:

On completion of the course, attendees will have;

- Understanding of the Payments Industry, transactional processes, terminology, players and providers' relationships.
