

CONTINUITY & RESILIENCE

5 Days - CISSP (Certified Information Systems Security Professional) aspirants Workshop

CISSP certification description:

In an increasingly complex cyber world, there is a growing need for information security leaders who possess the breadth and depth of expertise necessary to establish holistic security programs that assure the protection of organizations' information assets.

CISSP is the most globally recognized certification in the information security market. Required by the world's most security-conscious organizations, CISSP is the Gold Standard credential that assures you have the deep technical and managerial knowledge and experience to effectively design, engineer, and manage the overall security posture of an organization.

Backed by (ISC)², the globally recognized, not-for-profit organization dedicated to advancing the cyber, information, software, and infrastructure security field, the CISSP was the first credential in the field of information security to meet the stringent requirements of ISO/IEC Standard 17024.

The CISSP draws from a comprehensive, up-to-date, global common body of knowledge (CBK) that ensures security leaders have a deep knowledge and understanding of new threats, technologies, regulations, standards, and practices.

The CISSP exam tests one's competence in the 8 domains of the CISSP CBK, which cover:

- Security and Risk Management
- Asset Security
- Security Engineering
- Communications and Network Security
- Identity and Access Management
- Security Assessment and Testing
- Security Operations
- Software Development Security

Who should become CISSP:

- Security Consultant
- Security Analyst
- Security Manager
- Security Systems Engineer
- Chief Information Security Officer
- IT Director/Manager
- Security Auditor
- Director of Security
- Security Architect
- Network Architect

Prerequisites to become CISSP

This course is designed for individuals who have Information Systems security background and wish to prepare for skills in the planning, management and/or administration of information security. Related experience must include a minimum of at least five years direct full-time security professional work experience in two or more of the eight domains (as mentioned above).
