

CONTINUITY & RESILIENCE

2 Day Continuous Auditing Methodology Workshop

Workshop description:

Whether or not your audit department has the latest automated technology, continuous auditing may be an effective option for you. Continuous auditing involves performing control and risk assessments on a frequent basis, if not virtually in real-time. Recently, the need to accelerate audit activities has led to the increased adoption of continuous auditing as a vital monitoring tool. This course walks through the process of continuous auditing from start to finish, and prepares you to create your own customized continuous audit program. Participants will have an opportunity to review a detailed example and practice creating a customized continuous auditing program.

This workshop entitles you to 16 CPE credits.

Workshop Outcome:

Attendees will

- understand the continuous auditing concepts
- see how to improve inter-period controls monitoring
- learn how to use a continuous auditing approach
- improve cost effectiveness of their internal audit function

Learning Objectives:

- Learn where to begin a Continuous Auditing Program
- Understand the three phases of Continuous Auditing – Foundation, Approach and Execution
- Learn to evaluate and report successes
- Learn various uses and users for Continuous Auditing
- Understand the risks and challenges Continuous Auditing

Prerequisites

At least 2 years' experience in order to draw upon their professional audit experience.
