- Project Time Management
- Project Cost Management
- Practice Tests & Discuss Important Questions from PMI Perspective
- Discussions/ Role Play

Day 3: Project Management Program

- Project Quality Management
- Project Human Resource Management
- Project Communication Management
- Practice Tests & Discuss Important Questions from PMI Perspective
- Discussions/ Role Play

Day 4: Project Management Program

- Project Risk Management
- Project Procurement Management
- Project Stakeholder Management
- Practice Tests & Discuss Important Questions from PMI Perspective

- Discussion/ Role Play
- Revisit Everything
- Professional Responsibility and Ethics
- Question Exam Practice

PMP Exam

- Exam Application Process
- Tips for PMP Exam
- Discussion of Sample Exam Questions

Deliverables

- PMP Courseware
- Question Sets
- 35 Contact hours course completion certificate

FAQ's on new version

When will PMBOK® Guide Sixth Edition be released?

It was released on 06 September 2017.

When will The PMP® Exam change in 2018?

It changes on 26 March 2018.

PMP® Exam uses on the PMBOK® Guide as its primary reference. The exam changeover from Fifth to Sixth Edition is scheduled as follows:

- If your exam is scheduled before 26 March 2018, then your exam will reference the PMBOK® Guide – Fifth Edition.
- If your exam is scheduled on or after 26 March 2018, then your exam will reference the PMBOK® Guide – Sixth Edition.

Please note that there is not grace period and the cut-off date is absolute. You cannot request to be tested based on the Fifth Edition on/after 26 March 2018.

What are the major PMBOK® Guide changes?

- 1) There will be 49 processes from 47.
- 2) Three new processes will be added and one process will be deleted.

New processes:

- "Manage Project Knowledge"
- "Control Resources"
- "Implement Risk Responses"

Deleted process:

- Close Procurements process has been removed. Its functionality has been consolidated into the "Close Project or Phase Process"

3) Two Knowledge Areas will be renamed:

- From Project Human Resource Management to "Project Resource Management"
- From Project Time Management to "Project Schedule Management"

4) Some Processes will be renamed:

- From Perform Quality Assurance to "Manage Quality"
- From Plan Human Resource Management to "Plan Resource Management"
- From Acquire Project Team to "Acquire Resources"
- From Control Communications to "Monitor Communications"
- From Control Risks to Monitor Risks
- From Plan Stakeholder Management to "Plan Stakeholder Engagement"
- From Control Stakeholder Engagement to "Monitor Stakeholder Engagement"

5) Chapters Re-alignment

There will be chapters re-alignment in Front End (Chapters 1 to 3). The information in Chapter 1 to 3 will be combined into 2 chapters and a new Chapter 3 will be devoted to the Role of the Project Manager where many aspects of the Project Manager's role will be specifically mapped to the PMI Talent Triangle.

6) There will be Process Tailoring which means analyzing the project to determine how much emphasis to put on each process (based on the scope & size of the project).

7) There will be various notations throughout the new PMBOK® Guide differentiating between processes which are Ongoing (continuously executing) vs. "Non-ongoing processes. This concept will be emphasized for the first time in new PMBOK® Guide Sixth Edition.

8) The Project Scope vs Product Scope concept will also be emphasized for the first time in new PMBOK® Guide 6th Edition.

9) The Earned Value tool kit supported by the PMBOK® Guide will now include Earned Schedule Management".

10) There will be distinction between "Communication" (as in communicating between two people) and "Communications" (artifacts, such as published emails).

11) The new strategy, Escalate Responses provides for a PM escalating a risk to the appropriate party so that the risk is no longer his/her responsibility. Once escalated, the PM will now have the option of either:
A) Removing the risk from the project's risk register if desired, or
B) Keeping it in the risk register, but classifying it as Escalated/Assigned To."

12) The new Lessons Learned Register is now part of the set of ITTOs. Project Managers will now be encouraged to update on a frequent basis (not just at the end of the project). Updates can be done at any time throughout the project, especially at the end of project phases (similar to the Retrospective in Agile).

13) The PMBOK® Guide itself is taking on more of a voluntary instead of mandatory tone in some areas. For instance, for Requirements Collection, they might now say something to the effect that, here is a list of possible choices of tools. Choose any of these that best might fit your current project.

14) ITTO Bundling

There will be simplification of Inputs and Outputs in ITTO table. Tools & Techniques will be grouped under common headings.

15) New Appendix Information

- Summary of Key Concepts
- Summary of Tailoring Considerations
- Summary of Tools & Techniques

- Adaptive & Iterative Approaches

Which Version of the GUIDE Should I use to Study?

That's easy and only depends on when you are scheduled to take your PMP exam:

I am taking my PMP exam on or before: 25-March-2018: **You must study using PMBOK® Guide Fifth Edition.**

I am taking my PMP exam on or after: 26-March-2018: **You must study using PMBOK® Guide Sixth Edition**
